

Multi-Conveyor LLC

Your best...conveyed better.

Success Line "Quick Ship" Pre-engineered Conveyor Systems

Knowing that our customers rely on our quality and reputation, we developed a line of pre-engineered conveyor components that could ship quickly without customization. By pre-engineering and pre-fabricating the components for the Success Line of conveyors, we save on both time and expense, which translates to "value-driven, quick ship" solutions, hence, SUCCESS! This simplistic line of conveyors was designed so you can piece together exactly what you need, the sizes and specifications that work for you and accessories that you may want to consider. We even include an HP and Chain Pull calculation page to help build your equipment based on your immediate needs.

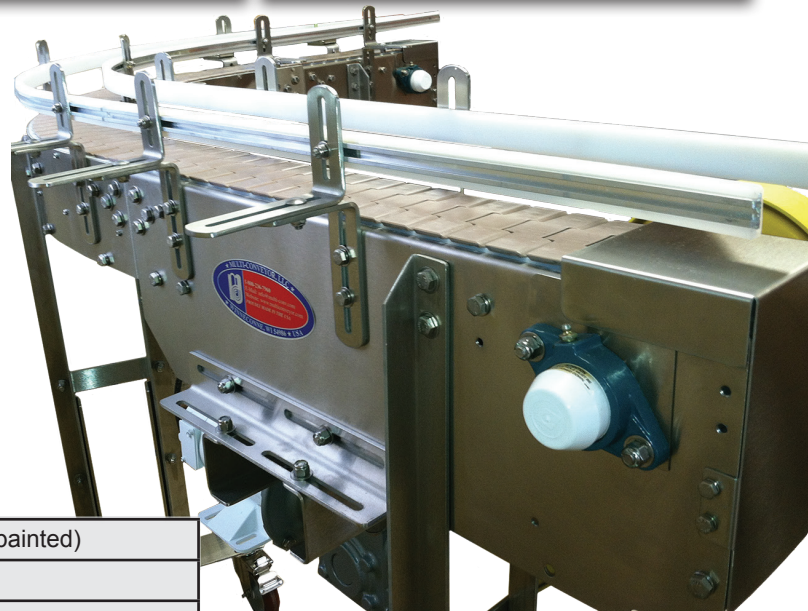

SUCCESS LINE: Modules and Configurations

- Parallel transfers
- Drive modules
- Idle end modules
- Intermediate conveyor (straight sections)
- Curve conveyor
(turn sections 24" radius at 30°, 45° or 90°)
